Preparing Targets

Using printed barcode labels is encouraged for all teams. They should be printed prior to the start of each game. Coaches should maintain control of their team's targets until it is time to hand them out, as the athletes are bringing their gear to the firing line.

To print labels, from within Orion's Match Competitors tab, select all of your athletes, right click, and Print Labels.

All range commands are built into Orion. Use Orion's Range Control tab to manage the range and issue commands to the athlete monitors.

With each Range Command click the Next Command button while vocalizing the command to your athletes.

Range Commands for 12 Bull Paper Targets

All range commands are reproduced, with permission, from the National Three-Position Air Rifle Council's rulebook.

Before a competition, the Range Officer must prepare the range for firing. Athletes may not move their equipment to the firing line until the Range Officer calls them to the firing line.

Recommended the Range Officer display the online Leaderboard using a projector or large screen TV on the range.

20:00 TO 30:00 MINUTES BEFORE START TIME (WHEN RECORD FIRING BEGINS)

If electronic targets are used or if targets are already hung, do not use the command GROUND YOUR RIFLES, but go directly to the YOU MAY UNCASE AND HANDLE YOUR RIFLES command.

Scoring Paper Targets

All weekly game scores are due Monday at Noon EST. Scores reported after this time will not be accepted.

Scoring

All paper targets must be scored by Orion as soon as reasonably possible after the athletes turn in their targets. Use Orion's Auto-Score to scan, score, and upload results.

If electronic targets were used scores must be imported into Orion. Athena imports the scores directly into Orion without any additional steps. For Sius or MegaLink systems, use their respective interfaces.

Reviewing Targets

All paper targets should be reviewed for accurate scoring. Targets highlighted in Yellow indicate too many or too few shots were found. Common causes and the steps to follow are listed below

Possibility 1: The Athlete Fired an Extra Shot

1. Identify the highest value shot on the target.
2. Select this shot, the shot will turn red once selected.
3. Right click and select "Mark as extra shot."
4. Orion will nullify the extra shot then apply a 2 point penalty to the lowest value shot.

Possibility 2: Sighter Outside the Sighter Ring

Sighter shots fired outside the sighter ring should have been marked by the range officer. These shots do not count against the athlete, and should be removed.

1. Identify the sighter shot outside the scoring ring.
2. Select this shot, the shot will turn red once selected.
3. Right click and select "Remove shot" (alternatively hold down the shift key and double-click near the center of the sighter shot).
4. Orion will remove the shot from the match.

Possibility 3: Athlete Missed the Scoring Rings

1. Identify the aiming bull that the athlete missed.
2. Right click near the center of the aiming bull and select Add Shot -> Missed Shot (alternatively hold down the Control key and double-click near the center of the aiming bull).
3. Orion will add a MISS to the aiming bull.

Viewing Results

Once scoring is complete, confirm that your team results were uploaded successfully to Orion's Result Center. Click on the globe icon to bring up the Internet results.

The Game results page will look similar to the following. If you can see your team results on the website, and they match what is reported in Orion, then your scores were successfully uploaded and reported.
